Demand for and supply of microfinance services: —

The microfinance demand has shown a trend of increasing growth for India as well as Assam. The supply of microfinance for India as a whole is at low level, which shares only 0.70% of gross domestic product of India.

Demand for Microfinance is —

Microfinance services are demanded by household, micro enterprises of both formal and informal sector. While household demand

models. For example SBLP model and MFI model.

SBLP is a national microfinance model of India which is under supervision of NABARD

SHG approach is quite older version of the microfinance in India. This ^{SBLP} model has worldwide attraction as a possible way of delivery microfinance services to poor that have been difficult to reach directly through banks.

MFI model is a newer model in Assam India. Under this method, finance is provided by a micro finance organisation

microfinance demand.

Supply of Microfinance

Micro finance is operating under two broad models. For example SBLP model and MFI model.

SBLP is a national microfinance model of India which is under supervision of NABARD

SHG approach is quite older version of the microfinance in India. This ^{SBLP} model has worldwide

Demand for Microfinance :-

Microfinance services are demanded by household, micro enterprises of both formal and informal sector. While household demand for microfinance arises due to consumption and to cope up other ~~and~~ inadvertent situations, microfinance demand is also urged as fresh investment for livelihood in the form of small and micro enterprises at individual level. It shows a bright
